

Civic Scientist is a community outreach program that sends scientists and engineers from Rice University and the Houston community to area middle and high schools. The program aims to present science to students in a way that interests and excites them about scientific discovery and innovation. Scientists and engineers from a variety of disciplines visit local classrooms to engage students in interactive discussions related to scientific research, facilitate hands-on activities and share information about their work and personal career journey.

Civic Scientists

- Demystify science by exposing K-12 teachers and students to experts
- Help teachers incorporate high-level science concepts into the classroom
- Inspire students to consider careers in science, technology, engineering & math
- Provide students with real-life applications for science and technology

*Dr. Ronda Alexander
Medicine*

*Dr. Robert Curl and Sir Harry Kroto
Nanotechnology and Science Education*

For more information or to schedule a classroom visit, please contact Dr. Stacey Kalovidouris, executive director of Rice University's Institute of Biosciences and Bioengineering.
