37. While decriminalizing marijuana has the potential to reduce racial disparities in the criminal justice system, evidence from several major cities indicates that disparities in marijuana arrests persist even after decriminalization. For example, in Philadelphia, marijuana possession arrests have decreased since the city decriminalized in 2014, but blacks are still five times more likely to be arrested for this offense. Similar trends are found in Chicago and New York. Marijuana decriminalization has the potential to reduce racial disparities in nonviolent drug arrests, but these findings highlight issues of uneven enforcement and the need for policy implementation that takes such biases in arrest into account. See Emily Gray, “Extreme Racial Disparities Persist among Marijuana Arrests Despite Decriminalization in Major US Cities,” *Extract*, March 9, 2016, <http://extract.suntimes.com/news/10/153/16990/despite-marijuana-decriminalization-african-americans-are-arrested-at-higher-rates-in-american-cities>.
